 MongoDB

EXPERIENCE

Intern - IKU Studio Company **Sep 2023 - Present**

Do the tasks below for web admin and web client:

- Conceptualized, designed, and developed a fully functional website for an online bookstore as a personal project to demonstrate my back-end development skills.
- Designed and implemented a database schema using MySQL to store book information, user data, and transaction records.
- Achieved a high level of code efficiency and optimization for improved performance.
- Demonstrated the ability to work independently and manage the entire development process from ideation to deployment.
- This project showcased proficiency in back-end development technologies, including PHP, Laravel, MySQL, and Livewire.
